

Dear Datamaran Partner,

Please work with your Client Success Manager on examples from our myriad of clients that reference the Datamaran outputs in their annual reports. You can also find insights to our [patented methodology](#).

Datamaran Boilerplate:

1. Datamaran's AI platform empowers [Company] to navigate the complex ESG landscape with confidence by transforming vast amounts of information on ESG-related risks into actionable insights. Datamaran is the leader in Smart ESG, enabling companies like [Company] to identify and prioritize issues material to our business and stakeholders, deepen internal expertise, monitor risks and opportunities in real-time, and authentically own our ESG strategy in-house. Through Datamaran's tech-enabled, dynamic, and data-driven approach, [company] has strengthened our strategy and governance processes to focus on and respond to relevant external events, evolving business priorities, and stakeholder expectations as we pursue our ESG goals and continue our sustainability journey.

Describing Your Materiality Assessment:

[Company] leverages Datamaran's AI-powered platform to conduct a double materiality assessment aligned with the Corporate Sustainability Reporting Directive (CSRD), providing a comprehensive view of both ESG (Environmental, Social, and Governance) impacts, risks, and opportunities (IROs) on the organization, as well as the organization's impact on society and the environment. By analyzing data from corporate annual filings, regulations, voluntary policy initiatives, news, media, and employee surveys, Datamaran's platform identifies relevant ESG IRO for continued monitoring.

This approach produces visualizations that serve as the foundation for [Company]'s ESG strategy and governance processes, supporting a balanced evaluation of specific ESG issues and trends in the context of our evolving strategy and the broader business landscape. Additionally, [Company] utilizes Datamaran's dynamic assessments for ongoing "pulse" analyses, which help identify shifts in the macro environment. The insights derived from these assessments are integrated into our business strategy, risk management, and ESG reporting, ensuring we are responsive to emerging IROs and aligned with regulatory standards like the CSRD.

Describing Your Enhanced Risk Management:

- [Company] is data-driven in our identification and monitoring of material risk. In [year], we began leveraging artificial intelligence (AI)-powered risk analysis software, Datamaran, to enhance our ESG governance processes, thereby harnessing innovation to power a continuous, evidence-based review of ESG-related risks within our regulatory, competitive, and operating contexts.
